

CRITICAL SYSTEM PROTECTION

Chris Robinson
Sales & Technical Director
24/7 Uptime Ltd

“We are processing data in a world that demands instant actions, instant reporting, instant business intelligence – hence we now live in an ***“always on world”***”

- Importance of SCADA, ERP, MRP, Process control, real time monitoring systems?
- Keep us fed, keep us safe, save our lives, help us get where we need to be, provide us with real time info
- Importance of real time reporting and BI availability?
- Downtime consequences of all or any of the above?

5 seconds? 1 minute? 5 minutes?

Health / Security / Manufacturing / Energy

Is downtime acceptable at all?

24/7 Uptime provide:-

- Protection against critical system downtime in ANY circumstances
- Multiple environment protection – SCADA, ERP etc. plus Diver BI – SQL, PDC (in fact any Windows server OS environment)
- Automated data backup to multiple UK based data centres

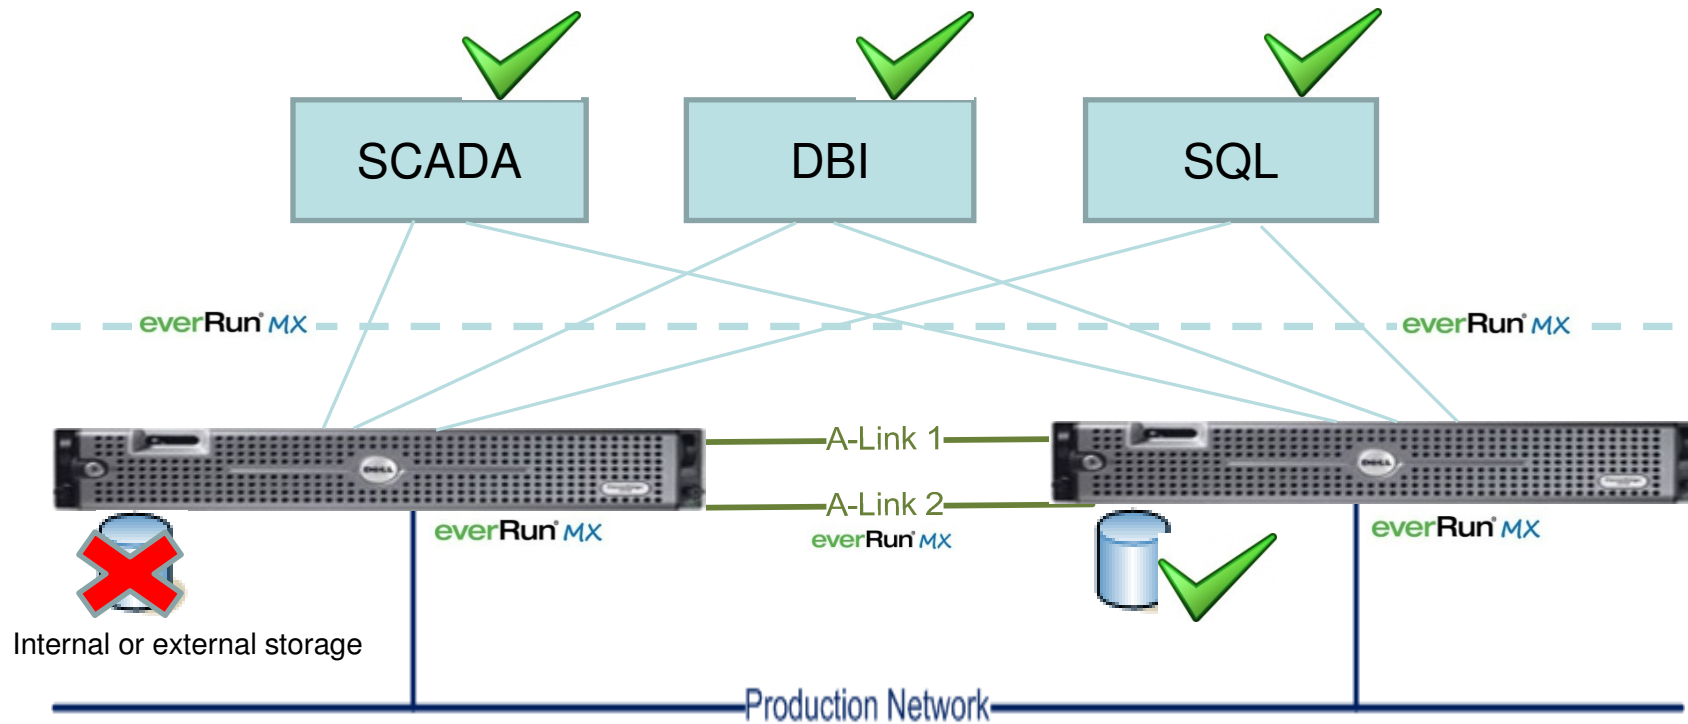

Elite partners of Marathon Technologies

Failback

everRun[®] MX Summary

- Real time protection against downtime in the event of component / multiple component and full host failure
- Zero downtime / data loss at time of failure AND at time of failback and restore
- Software based
- Standard HP / DELL / IBM etc hardware
- No need for shared storage
- 99.999% availability achieved
- Additional off site D/R option (hosted if required)

Replicate Data

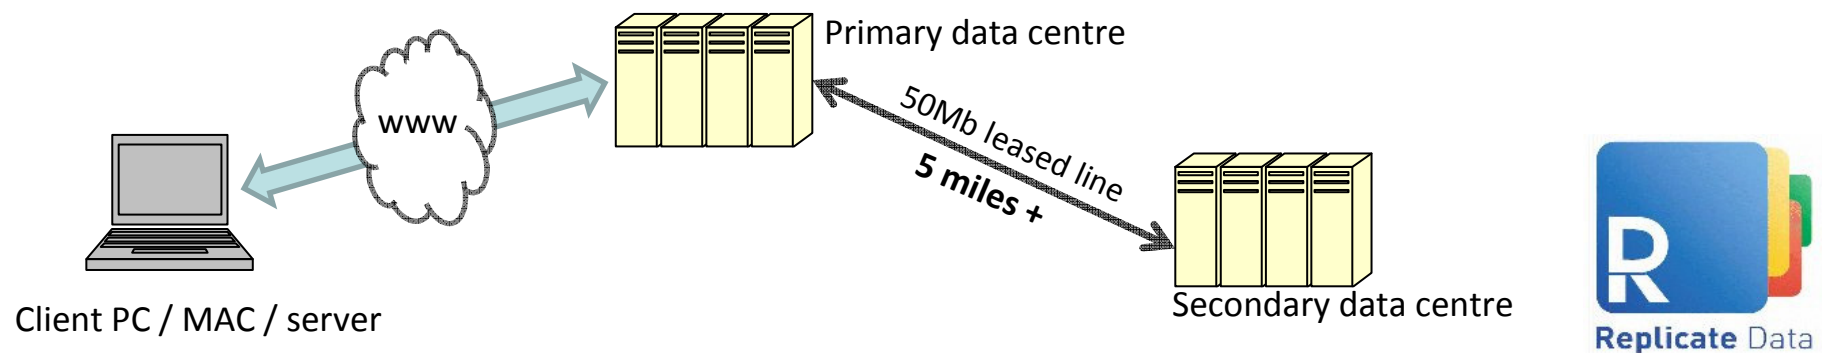

Automated offsite data backup

Peace of mind that data is protected

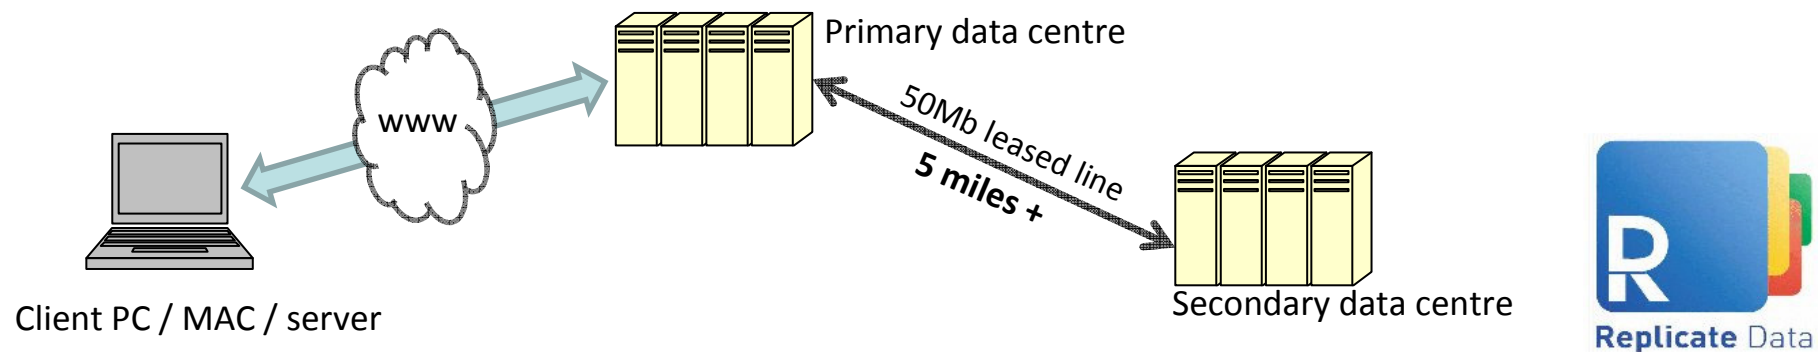

Replicate Data

- Simple to install – easy to use – easy to restore
- Automated - no human intervention
- Backup **any** data from **any** system (server, PC, Mac)
- Primary data centre – Manchester tier 1 data centre facility, ISO 27001 standards
- Secondary location – automatically synchronised to ISO compliant secure location more than 5 miles apart for geographical D/R resilience

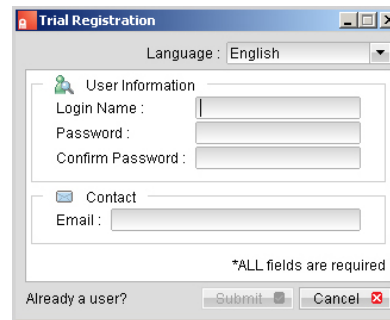

- Data is password protected and encrypted at rest and in transit
- Version control – restore latest version or from 2 days ago, 1 week ago, 1 month ago etc
- Backup on a fully customised schedule: daily, weekly, customised or even CDP (real time)

Easy to use, easy to install, easy to restore

- Install wizard
